Introduction :

This is an online Quiz web page. Online Quiz are an important method of evaluating the success potential of students. This research effort the individuals under consideration were students who would be enrolling in computer courses or Technologies Registrations. A prototype of a web-based Quiz system is described from the standpoint of the research effort, end user, and software development

Tools and Technique :

(a) Php
(b) CSS
(c) Xampp
(d) Vs code

Learning from the project :

1. From this project, I have learned about many things related to PHP

2 . As well as from CSS. I have learned about xampp - control.
I have learned about conditional statements like if , else, else if in PHP and use this in project like my own quiz project.

3. I have learned about the HTTP post method in PHP and the use of this to collect data after submitting an HTML form with method=" post

4. I have learned about from action in PHP

5. Apart from PHP i have also learned many concepts about css
